1st contact with paranormal world

- During this period, still very young, at 17, he had his first contact with the paranormal world.
- Some friends invited him to meet a man, well known as a "sensitive". He decided to do a test asking him about his family in far away, in Alagoas.
- The answer was totally unexpected : the man gave him detailed information about his father's serious health crisis in Alagoas.
- He refused to believe it because he knew the excellent physical shape of his father.
- A week later, a letter arrives from his mother (by ship), narrating the whole crisis, just as the psychic had told him.
- For a young man eager for knowledge, and gifted with rare sensitivity,
the way was opened for his quest for truth

Polytechnic College of Civil Engineering – After a clash

with a professor of Descriptive Geometry, he decides to no longer attend these classes, whatever the consequences. One night, **he got a psychographic message addressed to himself**, advising him to seek reconciliation and guiding him to undertake an important assigned homework by the professor: 1) he should go to a specific room at the National Library; 2) to look for bookshelf **X**; 3) to pick up "**my book**" title **Y**; 4) to open on page **Z**; 5) to study the exercise contained therein, which is very similar to the work he had to do for the class. The message was signed: **MONGE** (renowned ancient French mathematician). Result: highest grade with praise.

Case of a Swedish in the same pension he lived

Uchoa woke at dawn with piercing screams coming from one of the rooms from the pension where he lived. Realized they were cries of pain and **felt an uncontrollable desire** to get closer. Several people had already rushed to help. Uchoa, was only 17. He made his way through and put, **intuitively**,

his hands on the head of the man, who fell asleep immediately. He was later taken to hospital where he died of a crisis of meningitis (spinal cerebral). There was no medical explanation of how that man was able to fall asleep at the height of the crisis.

- Along with his UFO research, his scientific and educational activity gained new momentum. In 1971 he founded the “University of Pioneer Social Integration – UPIS,” in Brasilia (see www.upis.br).
- One of his goals with this University was to sponsor the *Morya* Universal Association – AUM, an entity he had created to promote alternative science courses.
- Besides being the founder of UPIS he was also the rector from 1971 until his death in 1996.
- The UPIS today, with its many colleges, is an example of a higher level of educational institution in Brazil

RIO DE JANEIRO – [RIO DE JANEIRO](#) (AP) — Brazil has ordered its air force to document any UFO sightings and make the data available to researchers and the public.

A decree in the official gazette says the [air force](#) will register any sightings by military and commercial pilots, along with air traffic controllers.

A spokesman says the air force has UFO archives dating back decades, but there had been no official order on what to do with the material. The spokesman could not be named under air force rules.

All past and future data — whether written reports, photos or video — will be processed by the air force and then housed in the National Archives in Rio de Janeiro.

In the decree published Tuesday, the air force says it will periodically submit UFO reports.

His work in the area of transcendental healing started to involve the participation of interplanetary beings, as was the case of the young **BERNADETE JUSTINIANO GOMES**, narrated in detail in his book **“The Transcendental”** - Healings and Phenomena.
